Work Experience

Zenduty (Xurrent) | Senior Software Developer

July 2024 - Present

- **Developing and maintaining** company's primary **web dashboard** for incident management (Zenduty)
- **Lead and develop** company's mobile application, published on (Play store / App store)
- Also contribute on the backend in Django, adding and refining APIs and incident workflows so the mobile and web experiences stay in sync.
- Added consistency all over the app to match the web dashboard's latest design system and improved performance by 30% with less usage of third party packages and using better logic flow for features and components.

Fijit | Senior Software Developer

June 2023 - June 2024

- Building and managing company's app from scratch to production (Play store / App store as Fijit)
- Managed the **entire frontend development** of the **Fijit app** as the **sole major frontend mobile developer**, handling everything from architecture to implementation and ensuring a seamless user experience.
- Improved load time by 60% and first paint by 45%

Streak (Zerodha) | Senior Software Developer

March 2021 - June 2023

- Developed and managed multiple **web apps**, streak.tech, academy.streak.tech, technicals.zerodha.com
- Oversaw the product and feature development of the **primary mobile app** (Streak) while actively contributing to coding and implementation.
- **Migrated** the backend from **Python to Go**, building the system **from scratch** to improve performance and scalability.

Propstory | Frontend Developer

Jan 2020 - Feb 2021

- Developed a web application which lets you edit any html page **(Code-to-UI Editor)** and lets you integrate various tracking pixels into it without any code knowledge for the company.

My Digital Portfolio

Subxtract (IOS APP) - React Native

A Subscription Tracking App built on React Native/Expo, following best coding practices and smooth flow with local first approach

Portfolio (Website) - Nextjs

My digital home on the web where I showcase my work and share what I'm learning. Used Next.js and added MDX so I can write blog posts with interactive code examples. It's clean, fast, and perfectly represents my style as a developer.

Skill

Tech Stacks

React Native | Expo | React JS / Next JS
Typescript | Node JS | Django | Go

Tools

Git | Redis | Mongo | Sentry | Firebase

Education

East Point College Of Engg. & Technology

2016 - 2020 | BE - CSE
